

AGC Tool Box Safety Talk

MATERIAL SAFETY DATA SHEETS

INTRODUCTION

1. Review any accidents or “near accidents” from the past week.
2. Describe the hazards of the work as they relate to your project. Explain or show the SAFE way of doing the job.
3. Give the TOOL BOX SAFETY TALK

The Material Safety Data Sheet (MSDS) is a detailed information bulletin prepared by the manufacturer or importer of a chemical that provides basic safety information on that chemical. Information on an MSDS helps prepare employers and employees to respond effectively to daily exposure situations as well as to emergency situations.

- Material Safety Data Sheets are addressed in OSHA's Hazard Communication Standard, which requires chemical manufacturers and importers to provide information on the hazards of the chemicals they produce or import.
- According to OSHA's Hazard Communication Standard, employers are required to make MSDS's available to employees for all hazardous chemicals used or stored in the workplace.
- Material Safety Data Sheets are divided into sections. At a minimum, OSHA requires that MSDS's contain at least the following information: Chemical Identity, Hazardous Ingredients, Physical and Chemical Characteristics, Fire and Explosion Hazard Data, Reactivity Data, Health Hazards, Precautions for Safe Handling and Use, and Hazard Control Measures.
- Always read the MSDS on a chemical before using that product. When reading an MSDS, concentrate on the information that is applicable to your situation. Generally, hazard information and protective measures should be the focus of concern.
- Follow instructions for safe use described in the MSDS. If you have questions, ask your supervisor or safety representative.
- Know where the MSDS's are located. They are to be accessible to all employees.

TOOL BOX SAFETY TALK – Week 2

TOPIC: MATERIAL SAFETY DATA SHEETS

To be **Completed** during the week of **01/02/2012**
 Please **Return** to the Safety Department by **01/09/2012**

Safety Fax: 480-726-0277
