

AGC Tool Box Safety Talk

LOCATION OF FALLS—FATAL

INTRODUCTION

1. Review any accidents or “near accidents” from the past week.
2. Describe the hazards of the work as they relate to your project. Explain or show the SAFE way of doing the job.
3. Give the TOOL BOX SAFETY TALK

Falls are the leading cause of fatalities in the construction industry. Construction workers, especially in roofing and framing, are exposed to falls from rooftops, skylights, scaffolding, upper-level floor openings and ladders. Recent statistics show an average of 362 fatal falls have occurred each year, with the trend on the increase. These falls include:

- 37% from roofs.
- 20% from scaffolds
- 15% from ladders.
- 9% from structural steel.
- 4% from floors, loading docks and ground level.
- 3% from non-moving vehicles.

To protect yourself from falls, watch your step, wear non-skid footwear, and always use available fall protection systems.

TOOL BOX SAFETY TALK – Week 30

TOPIC: LOCATION OF FALLS - FATAL

To be Completed during the week of 07/16/2012
 Please Return to the Safety Department by 07/23/2012

Safety Fax: 480-726-0277
