

AGC Tool Box Safety Talk

SLIPS/TRIPS

INTRODUCTION

1. Review any accidents or “near accidents” from the past week.
2. Describe the hazards of the work as they relate to your project. Explain or show the SAFE way of doing the job.
3. Give the TOOL BOX SAFETY TALK

Each year slips and falls injure too many construction workers. Slipping on the floor is bad enough, but falling from a height can be disastrous. Workers can eliminate many slipping and tripping hazards by following the principles of good housekeeping. Take these steps to help keep your workspace “fall proof”:

- Clean up all spills immediately.
- Remove clutter from stairs and walkways.
- Cover or elevate cables that cross walkways.
- Repair uneven, defective flooring, or worn stairs.
- Maintain proper lighting.
- Keep trash and loose objects picked up and dispose of them regularly.
- Store all tools and materials in their place.
- Keep ramps slip resistant with special anti-slip paint or other slip resistant material.
- Avoid carrying materials that will block visibility.

TOOL BOX SAFETY TALK – Week 35

TOPIC: SLIPS/TRIPS

To be **Completed** during the week of **08/20/2012**
 Please **Return** to the Safety Department by **08/27/2012**
